About Helio Resource Corp.

Helio Resource Corp. is a Canadian based junior gold exploration company focusing on its orogenic shear zone-hosted Gaban gold project in Peru.

In September of 2019, Helio completed the acquisition of the Gaban Gold and Tinka I.O.C.G. projects in Peru from Palamina Corp. The Gaban Gold Project, located in the Puno Orogenic Gold Belt in south eastern Peru, is approximately 750km east-south east of Lima. Helio is exploring shear zones within Gaban as the possible source rock of the alluvial gold in the drainages at Gaban and at Madre De Dios, where they are currently being mined by artisanal miners.

Helio has completed 3 reconnaissance exploration programs between October and December of 2019. Results are pending and will be released when received. A surface rights study is also being completed in order to assist with drill planning and permitting.
